

Department of Macroeconomics and International Relations

University of Rzeszów

and

Voivodeship Labour Office in Rzeszów

have the honour of inviting

The conference is a succeeding event within series of international scientific meetings linking economic issues with employment problematic. Analysis of limitations of present-day labour markets on the following levels: local, regional, national and international, will do as hammer model solution improving labour market out - final effect of the event. The debate will take place in midst of theoreticians and practitioners of the given problematic, i.e. representatives of scientific world amongst other from Ukraine, Czech Republic, Germany, Slovakia and Georgia, creators of national and regional labour market policy, representatives of educational institutions, territorial self-government units and business partners as well as people interested in co-creating new solutions in the area of labour market.

Each of us is an author and active participant of present-day labour market. It is worth giving expression to it by participating in the second edition of the international scientific event.

II INTERNATIONAL SCIENTIFIC CONFERENCE
